PHOTO INTELLIGENCE MEMORANDUM

COMMUNIST ARTILLERY POSITIONS IN THE AMOY AREA

GP/I-62

(Project 70.170)

16 February 1955

Declass Review by NIMA/DOD

CENTRAL INTELLIGENCE AGENCY  
Office of Research and Reports

TOP SECRET

COMMUNIST ARTILLERY POSITIONS IN THE AMOY AREA

This memorandum reports the completion of a photographic study of the artillery positions in the vicinity of Amoy Island. This study was accepted as a "crash" project at the request of

25X1A

[REDACTED], CCI. Within four days as much photography as possible had to be located, procured, studied, and reported on.

25X1C

[REDACTED] photos were the latest available and were the primary source of our report. Acetate overlays were prepared and gun positions, both empty and occupied, were located and identified.

The original acetate overlay drawing was delivered to the requester in time for him to meet his deadline. In addition, the requester was orally briefed on the defense and military situation as it appeared on the photography.

This report was prepared on a "crash" basis, and recognized to be incomplete, but was the best that could be done within the time limits set. As a result of this report, the value of current information from photography was recognized more fully by CCI, and additional// continuing projects were initiated to maintain situation maps in the Amoy and Matsu areas to supplement/other information received by CCI.
